

University Avenue Service Road Traffic Changes Project

Project Update – November 14, 2024

Retaining Wall, Restoration, and Signage

This week, the Contractor installed concrete pedestrian ramps, began restoration work on boulevards, and continued work on the new retaining wall along the west side of University Avenue (over Rice Creek)

Next week, the Contractor plans to continue work on the retaining wall (over Rice Creek), install signs, add mulch and plantings in some areas, and continue restoration work on the boulevards along the trail.

Please note that all construction scheduling is tentative, weather-dependent, and subject to change.

Construction

The Contractor's hours will be from 7:00 a.m. to 7:00 p.m., Monday-Friday. There is potential for occasional work outside of these hours upon City approval.

Please keep in mind that this type of construction may generate noise, dust, mud, and be disruptive to the area. Please be patient with the Contractor and contact us if you have any concerns we can help with.

Resident Access

The City and Contractor will work to minimize inconvenience to residents during construction. Residents can expect to have driveway access during construction except when major construction events are occurring on their street. We ask that residents, including children, remain outside the immediate work zone and exercise caution navigating the project area wherever you see workers, equipment, or warning signs.
